

Imprint

Simple and Inexpensive

The **TabBand Imprint** patient identification bracelets are designed for card imprinters

Simple Saves You Money

New adhesive design is faster and less expensive

Slice your identification band cost by using the *TabBand Imprint*.

How?

TabBand strips hospital bands to simple, elegant basics. Simple saves.

TabBands use a powerful adhesive closure instead of a more expensive and abrasive metal or plastic stud.

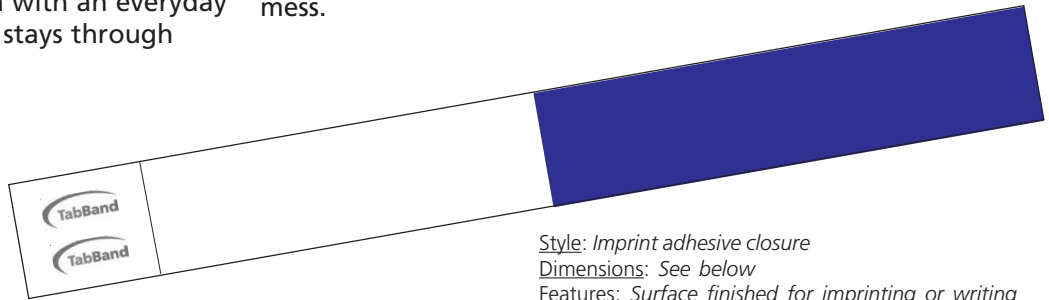

The specially treated surface makes it easy to imprint patient information — or even to write it on with an everyday pen or pencil. And it stays through baths and hard use.

TabBand Imprint bracelets go on fast: just peel off the adhesive backing and stick it together.

Select all-white or color-code patients with one of six other colors.

And all *TabBand* edges are blade-cut, not heat-cut, so they're smooth. The material itself is soft, so it doesn't rough-up delicate skin.

Oh, and they come in a classy plastic dispenser box that saves space and mess.

Style: Imprint adhesive closure

Dimensions: See below

Features: Surface finished for imprinting or writing
